INDEPENDENT ASSURANCE REPORT

To the management of Chunghwa Telecom Co., Ltd. (CHT):

We have been engaged, in a reasonable assurance engagement, to report on CHT management's assertion that for its Certification Authority (CA) operations at locations as enumerated in Appendix C, throughout the period 1 June 2025 to 31 May 2026 for its CAs as enumerated in Appendix A, CHT has:

- disclosed its TLS certificate life cycle management business practices in in the applicable versions of its CHT Certification Practice Statement ("CPS") and CHT Certificate Policy ("CP") as enumerated in Appendix B including its commitment to provide TLS certificates in conformity with the CA/Browser Forum Requirements on the CHT website, and provided such services in accordance with its disclosed practices
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and TLS certificates it manages is established and protected throughout their lifecycles; and
 - TLS certificate subscriber information is properly authenticated
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorized individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9.

The CA/Browser Forum Baseline Requirements for the Issuance and Management of Publicly-Trusted TLS Server Certificates require the CA to operate controls to adhere to the Network and Certificate System Security Requirements. The WebTrust

Tel : +886 2 2346 6168
Fax : +886 2 2346 6068

Principles and Criteria for Certification Authorities – Network Security address this requirement and are reported on in a separate report.

Certification authority's responsibilities

CHT's management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Management (ISQM) 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor's responsibilities

Our responsibility is to express an opinion on management's assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management's assertion is fairly stated, and, accordingly, included:

- (1) obtaining an understanding of CHT's TLS certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of TLS certificates;
- (2) selectively testing transactions executed in accordance with disclosed TLS

Fax : +886 2 2346 6068

- certificate lifecycle management business practices;
(3) testing and evaluating the operating effectiveness of the controls; and
(4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Relative effectiveness of controls

The relative effectiveness and significance of specific controls at CHT and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, CHT's ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Basis for qualified opinion

During our procedures, we noted the following that caused a qualification of our opinion:

Observation	Relevant WebTrust TLS Baseline Criteria
We noted that 8 certificates issued by HiPKI OV TLS CA - G1 with private keys previously revoked with reason code <i>keyCompromise</i>. (bug #2012274) This caused Criterion 2.17 of WebTrust Principles and Criteria for Certification Authorities - TLS Baseline Version 2.9 not to be met.	2.17 The CA maintains controls to provide reasonable assurance that it rejects a certificate request if one or more of the following conditions are met: - The Key Pair does not meet the requirements set forth in Section 6.1.5 and/or Section 6.1.6; - There is clear evidence that the specific method used to generate the Private Key was flawed;

Fax : +886 2 2346 6068

	• The CA is aware of a demonstrated or proven method that exposes the Applicant's Private Key to compromise; • The CA has previously been notified that the Applicant's Private Key has suffered a Key Compromise, using the provisions of Section 4.9.1.1CA's procedure for revocation request as described in Section 4.9.3 and Section 4.9.12; and • The Public Key corresponds to an industry-demonstrated weak Private Key. For requests submitted on or after November 15, 2024, at least the precautions from Section 6.1.1.3 SHALL be implemented.
--	--

Qualified Opinion

In our opinion, except for the matters described in the basis for qualified opinion section above, throughout the period 1 June 2025 to 31 May 2026, CHT management's assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9.

This report does not include any representation as to the quality of CHT's services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9, nor the suitability of any of CHT's services for any customer's intended purpose.

Other Matters

Without modifying our opinion, we noted the following other matters during our procedures and have considered the nature of these matters in our risk assessment and in determining the nature, timing, and extent of our procedures. This included performing procedures to understand the root cause disclosed by the CA, and if facts and circumstances noted in our examination agreed with what has been disclosed. We have also considered the procedures the CA has designed and noted if implemented properly and operated effectively, the controls would address the root cause. We did not perform any procedures subsequent to this report as to the effectiveness of the controls implemented.

Matter Topic	Matter Description	Relevant WebTrust TLS Baseline Criteria or CA/Browser Forum Baseline Requirements
1	CHT disclosed in Mozilla bug #2025231 that a Test Website certificate was not revoked.	Criterion 1 of WebTrust Principles and Criteria for Certification Authorities - TLS Baseline Version 2.9 which refer to 2.2 Publication of information of CA/Browser Forum Baseline Requirements

While the CHT's assertion notes all issues disclosed on Bugzilla through the audit period of this report, we have only noted those instances relevant to the CAs enumerated in Appendix A and applicable to the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9.

We also note that during the audit period, Chunghwa Telecom revoked the GTLSCA-G1 CA certificate (Certificate Serial Number: 00 99 6d 5f e9 ad e1 6c dc 8e cd bf ed b1 4a 32 95) on April 23, 2026, as described in Chunghwa Telecom's assertion. Our procedures included verifying that the CA certificate was on the eCA-G2 Certificate Revocation List and that the revocation was publicly disclosed through the CA repository website. However, the GTLSCA-G1 CA was not within the scope of our audit. Our procedures with respect to this matter were limited to the CAs as enumerated in Appendix A.

Use of the Qualified Mark

CHT's use of the WebTrust for Certification Authorities – TLS Baseline Qualified Mark constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional

Appendix C - Locations and Facilities In-Scope

Location	Facilities
Taipei, Taiwan	Data Center, Main Office
Taichung, Taiwan	Data Center(DR Site)

MANAGEMENT'S ASSERTION OF CHUNGHWA TELECOM

Chunghwa Telecom Co., Ltd. (CHT) operates the Certification Authority (CA) services known as CAs in Appendix A and provides TLS CA services.

The management of CHT is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its website, CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to CHT's Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

CHT management has assessed its disclosures of its certificate practices and controls over its CA services. During our assessment, we noted the following observations which caused the relevant criteria to not be met:

Observation	Relevant WebTrust TLS Baseline Criteria
We noted that 8 certificates issued by HiPKI OV TLS CA - G1 with private keys previously revoked with reason code <i>keyCompromise</i> . This caused WebTrust Principles and Criteria for Certification Authorities - TLS Baseline Version 2.9 Criterion	2.17 The CA maintains controls to provide reasonable assurance that it rejects a certificate request if one or more of the following conditions are met: • The Key Pair does not meet the

Observation	Relevant WebTrust TLS Baseline Criteria
2.17 not to be met.	requirements set forth in Section 6.1.5 and/or Section 6.1.6; • There is clear evidence that the specific method used to generate the Private Key was flawed; • The CA is aware of a demonstrated or proven method that exposes the Applicant's Private Key to compromise; • The CA has previously been notified that the Applicant's Private Key has suffered a Key Compromise, using the provisions of Section 4.9.1.1CA's procedure for revocation request as described in Section 4.9.3 and Section 4.9.12; and • The Public Key corresponds to an industry-demonstrated weak Private Key. For requests submitted on or after November 15, 2024, at least the precautions from Section 6.1.1.3 SHALL be implemented.

Based on that assessment, in CHT management's opinion, except for the matters described in the preceding table, in providing its TLS services at locations as enumerated in Appendix B, throughout the period 1 June 2025 to 31 May 2026, CHT has:

- disclosed its TLS certificate life cycle management business practices in the applicable versions of its CHT Certification Practice Statement ("CPS") and CHT Certificate Policy ("CP") as enumerated in Appendix B.

including its commitment to provide TLS certificates in conformity with the CA/Browser Forum Requirements on the CHT website, and provided such services in accordance with its disclosed practices

- maintained effective controls to provide reasonable assurance that:

- the integrity of keys and TLS certificates it manages is established and protected throughout their lifecycles; and
 - TLS certificate subscriber information is properly authenticated
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorised individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities – TLS Baseline v2.9.

CHT has disclosed the following matters publicly on Mozilla's Bugzilla platform:

Bug ID	Description	Date Opened	Date Closed
<u>2005567</u>	Chunghwa Telecom: CA Certificates Published in PEM format	2025-12-12	2026-02-03
<u>2005762</u>	Chunghwa Telecom: Failure to respond to CPR within 24 hours	2025-12-12	2026-02-05
<u>2008260</u>	Chunghwa Telecom: Delayed audit disclosure for GTLSCA	2026-01-01	2026-02-20
<u>2008782</u>	Chunghwa Telecom: Findings in 2025 WebTrust Audit - GTLSCA Audit Incident Report #1 - mass certificate revocation plan	2026-01-07	2026-02-18
<u>2008788</u>	Chunghwa Telecom: Findings in 2025 WebTrust Audit - GTLSCA Audit Incident Report #2 - Domain validation records without the TLS BR version	2026-01-07	2026-02-11
<u>2008799</u>	Chunghwa Telecom: Findings in 2025 WebTrust Audit - GTLSCA Audit Incident Report #3 - Missing vulnerability scan	2026-01-07	2026-02-20
<u>2008803</u>	Chunghwa Telecom: Findings in 2025 WebTrust Audit - GTLSCA Audit Incident Report #4 - Missing evaluation for third parties	2026-01-07	2026-02-13

Bug ID	Description	Date Opened	Date Closed
<u>2009043</u>	Chunghwa Telecom: Delayed disclosure to Bug 2008782 GTLSCA Audit Incident Report #1 - mass certificate revocation plan	2026-01-08	2026-02-20
<u>2009045</u>	Chunghwa Telecom: Delayed disclosure to Bug 2008788 GTLSCA Audit Incident Report #2 - Domain validation records without the TLS BR version	2026-01-08	2026-02-20
<u>2009046</u>	Chunghwa Telecom: Delayed disclosure to Bug 2008799 GTLSCA Audit Incident Report #3 - Missing vulnerability scan	2026-01-08	2026-02-20
<u>2009048</u>	Chunghwa Telecom: Delayed disclosure to Bug 2008803 GTLSCA Audit Incident Report #4 - Missing evaluation for third parties	2026-01-08	2026-02-20
<u>2012274</u>	Chunghwa Telecom: Issuance of certificate using keys previously reported as compromised	2026-01-24	2026-03-09
<u>2025231</u>	Chunghwa Telecom: Test Website certificate not revoked	2026-03-23	2026-04-25

During the audit period, Chunghwa Telecom revoked the GTLSCA-G1 CA certificate (Certificate Serial Number: 00 99 6d 5f e9 ad e1 6c dc 8e cd bf ed b1 4a 32 95), which was issued by ePKI Root Certification Authority - G2, on April 23, 2026. The CA was originally established to support TLS certificate services for the Ministry of Digital Affairs (MODA). Following the expiration of the related service contract and confirmation that continued operation was no longer required, the CA certificate was revoked and the revocation was publicly disclosed through the CA repository website.

Signature: Quen-Zong Wu

Title: Vice President
